CCB Meeting
Decision Summary

Requests Covered

	Submitted By	Area Affected	Type Of Request	Cost/Schedule Impact	Document Title
01	Val Sorokine	Phobos	Configuration Change	Low	Emergency
02	Johnnie Pearson Daniel Fox	WQT (Web Query Tool)	UI Changes	None	
03	Vanessa Grandy	IEdison II	Environment Change	Low	
04	Mike Farahbakhshian	Commonspred.era.nih. gov	Configuration Change	Low	

Request & Decision Summary

	Submitted By	Area Affected	Type Of Request	Cost/Schedule Impact	Document Title
01	Val Sorokine	Phobos	Configuration Change	Low	
	Request: Operations team is proposing that we change HTTP configuration in the Internal Applications production environment in order to put in place a workaround for the error that occurs a few times every minute from GCM application: "File does not exist: /opt/oracle/product/902/impprd/era/Apache/Apache/htdocs/images/blank.gif". We are proposing creating /images subfolder in the HTTP environment and placing the missing image file there, in order to stop the error from being reported. At the same time we informed GCM development team what .JSP code needs to be changed in the application in order to permanently fix the error. That code change request will be submitted as a separate CCB approval request. **Decision**: No issues raised—Approved				
02	Johnnie Pearson Daniel Fox	WQT (Web Query Tool)	UI Changes	None	
	Request: The following changes are needed to the Web QT UI to make it more "user-friendly," as follows: • In the Required Fields section, change the label "Grant IC" to read "Admin IC." • In the "Grant Dates" section, remove the "Council Mtg. User's IC" text box. This will simplify development, testing, and training. Also, it will take at least 2 more days of development time because of the complex logic and conditional error checking needed to implement. **Decision:** No issues raised—Approved				
03	Vanessa Grandy	IEdison II	Environment Change	Low	
	Request: The user has requested to continue the pilot of iEdison II for at least a couple of weeks pending agreement from DOE to allow all extramural institutions to submit invention disclosure reports which are funded by DOE. **Decision:** No issues raised—Approved				
04	Mike Farahbakhshian	Commonspred.era.nih .gov	Configuration Change	Low	

Request:
Currently the machine commonsprd.era.nih.gov does not match prdcluster/devcluster with respect to two things:
- commonsprd uses 'eager' virtual memory usage, whereas prdcluster uses 'lazy' memory usage
- Several open source packages in use on prdcluster are not on commonsprd

This did not matter when commons and IMPAC were separate things, but now that eRA is a unified project, there have been strong encouragements to keep all machines in sync.

Decision: No issues raised—Approved
